In the Drawings

Applicant submits revised Figures 8 and 9 for consideration by the Examiner.

In the Abstract

Please cancel the Abstract as filed and insert the following in its entirety:

ABSTRACT

B₁ A support post for a guardrail has a strong axis and a weak axis which is substantially perpendicular to the strong axis. The support post is adapted to receive a guardrail such that the rail face of the guardrail runs generally perpendicular to the strong axis such that the support post resists an impact on the face of the guardrail and yields to an impact force on the end of the guardrail. --

In the Specification

B₂ On page 20, line 9, after "configuration" please insert with extensions substantially parallel to the flanges and protruding beyond the respective webs. --

On page 24, line 19, cancel the first and second occurrences of "230" and substitute -- 330-- therefor.
